

Trend Micro™ InterScan™ Gateway Security Appliance

All-in-one security appliance that blocks viruses, spyware, spam and other threats at the Internet gateway

Viruses, spyware, spam, and inappropriate content can disrupt business operations, and impact employee productivity. Hidden in email or Web pages, these threats consume system and network resources and drive up support costs. In addition, phishing attacks use fraudulent email for identity theft, while some spyware steals financial or other confidential information.

Trend Micro InterScan Gateway Appliance delivers all-in-one, comprehensive protection against security threats at the Internet Gateway, before they can damage your network. This Secure Content Management appliance saves time and money by reducing support calls, increasing the productivity of employees, and preserving the availability of network resources.

FIRST IN GATEWAY DEFENCE

Trend Micro outpaces competitors with its six-year gateway market leadership and proven innovation in gateway antivirus.*

BEST PROTECTION FROM MORE THREATS

From a single Web-based console, InterScan Gateway Security Appliances block threats automatically including: viruses, spyware, spam, phishing, botnet attacks, harmful URLs and inappropriate content—to provide a critical layer of security complementing desktop antivirus.

EASY ADMINISTRATION

InterScan Gateway Security Appliance comes preconfigured with software making it easy to deploy. This appliance augments existing firewall and VPN solutions to stop outbreaks early. Damage Cleanup Services eliminates virus and spyware infections automatically, saving administrative time and dramatically reducing downtime.

KEY BENEFITS

- Stops multiple threats from entry at Internet gateway
- Preserves network resources and employee productivity
- Easily deploys with preconfigured appliance
- Enables easy, one-stop support and upgrades
- Provides easy management and automated cleanup

InterScan Gateway Security Appliance
Blocks viruses, spyware, spam, phishing, botnet attacks, harmful URLs and inappropriate content before they enter your network

- 1 Blocks multiple Internet threats
- 2 Complements existing firewall and VPN
- 3 Decreases spam, email storage and regulatory compliance cost
- 4 Cleans up spyware and viruses at the desktop
- 5 Controls users' Web access with scheduling and policies

Trend Micro™ InterScan™ Gateway Security Appliance

ALL-IN-ONE GATEWAY SECURITY

- Prevents viruses, spyware, spam, phishing and botnet attacks, before they enter your network
- Blocks unwanted email and checks Real-Time Blacklists to reduce inbox clutter, traffic, inappropriate content, regulatory compliance costs, and storage issues
- Real-time scan of SMTP, HTTP, FTP and POP3 protocols
- Includes URL filters to block access to harmful and inappropriate Websites by category and according to schedules
- Superior spam blocking with Network Reputation Services and a composite spam scanning engine gives IGSA the advantage over other solutions

EASY TO DEPLOY AND MANAGE

- Fast appliance installation includes pre-hardened operating system and pre-installed Security Content Management software running on optimized hardware
- Limits network alterations by complementing existing firewall and VPN solutions as well as providing transparent installation with no required client changes
- Damage Cleanup Services automates malware and spyware clean up from client PCs
- Simplifies support with a single vendor for hardware and software, available extended warranty and easy licensing upgrades
- IGSA and Trend Micro Control Manager enable central management of multiple branch offices and aggregates reporting for quick and easy analysis

EFFECTIVE, EARLY PROTECTION

- Stops viruses earlier—before threat-specific detection signatures are available:
 - IntelliTrap blocks unknown malware disguised by compression
 - Outbreak Prevention Services automatically defends against new virus outbreaks
